

DISCOVER THE POWER OF **SkipAssist**™

Before **SmartSearch**™

After **SmartSearch**™

The opportunity cost of not having infoGRID™
Plug in your own numbers above for time taken on a normal mix of daily skip trace files. Layers of the most complete and up to date information of multiple data sources (please see full list on back) are processed with proprietary **infoGRID**™ technology, producing up to 17 different levels of information* in just 1 second.

Search

- **infoGRID**™ technology dramatically reduces time to securely generate layers of current and past years information* around the debtor record.
- Some of the key name, address & phone information* is generated by proprietary artificial intelligence and soundex capability that could not be recovered by any other method.
- This approach can streamline the gathering of essential information* down to 1 second!
- Save time & money, and eliminate keyboarding errors by connecting your application to the **SkipAssist**™ online interface. Please ask your IT department to contact us for details.

Interpret

- **SmartSearch**™ allows the researcher to focus on what they are good at. The human eye can read into information* with intuitive insight.
- All **SkipAssist**™ results* are presented in a colour coded format that is easy to understand.
- The **SkipAssist**™ intuitive design is continuously being enhanced,
- driven by a steering committee of experienced Skip Trace, Investigative, IT and Operations Managers.
- 50% of the performance is in the system and 50% is in the training of our user base. We include a power user tips & tricks 1-on-1 remote training course at no extra cost.

Call & Verify

- Any record within the result set can be easily edited & resubmitted, either as a **QuickSearch** or a **SmartSearch** without keying in all the information. This significantly speeds up the verification process.
- All verified results* can be tagged on-the-fly and immediately captured within the session or with some additional programming, selectively sent to your application.

The Freshest Telco Sources Available in Canada

Compiled and updated at least monthly and is the only national business and residential listing database sourced directly from telephone directory publishers from coast to coast. Information has also been enhanced from InfoGrid's historical public domain records. The database is provided under license for restricted use*.

*See InfoGrid Systems Inc's restricted license conditions. InfoGrid Systems Inc. certifies compliance with Canada's Privacy Laws.

Integrated Live Lookup/Scrubs For All Systems!

Supported Applications:

- ACE • Collect • Alltrac • TDC • Artiva • CMS
- Collect! online • Collection Management System
- CUBS & Customized Variants • Custom File on hard drive
- Debtmaster • DebtNet • FACS/FACS Workstation
- Q&A (Custom) • Techcom DRS • ICEware • Summitt
- Legacy Green Screen Applications from Linux, DOS, AS400
- Porcupine - All releases • CRS • Ontario Systems
- Many Web-Based Applications • MS Dynamics • Quantrax RME
- Custom connectivity can be built within 24 hours at no charge

Connectivity to the following Operating Systems:

- All versions of: • Windows • Linux • DOS • Apple • IBM AS400
- Other IBM Mainframe O/S's • Web based applications

Partial List of Telnet Clients:

- Anzio Lite • Esker Viewer • HyperTerminal • HyperACCESS
- Procomm Plus • Putty • QVT/Term • UV/Term • ZOC
- Accuterm • CU*Emulate • PowerTerm WebConnect
- SecureCRT • WRQ Reflection • AlphaCom

On-the-fly Scrubs

- Any flat-file format • Customized Customer Profile for Input/Output • Scrub Summary Reports • DRS Scrubs (+ custom briefcase indicators) • RPC's • Supports Auto-Dialer ready output
- Trace Records Of Interest • Probability Of Locate index

Security & Compliance

Our servers are housed in high-security data centres in Ontario, Canada with the following certifications: PCI, SSAE16 SOC 1 Type 2, CSAE 3416 Type 2, ISAE 3402 Type 2, AT 101 SOC 2 Type 1, PCI DSS Report on Compliance. No expatriation of data. For detailed compliance and security documentation, please ask.

InfoGrid Systems Inc. assures compliance with PIPEDA, FOIPPA & similar Privacy legislation within Canada.

- Integrated Scrub & Trace
- Curing delinquent A/R
- Information to increase recovery
- Powerful workflow indicators
- Auto-dialer ready RPCs
